

## College Station, TX

The screenshot displays a web-based GIS application for College Station, TX. The main map area shows a street grid with several red camera icons and green emergency shelter icons. A legend on the right side lists the following layers: Streaming Video (red camera icon), Emergency Shelters (blue dot icon), City Streets (black line icon), Other Roads (grey line icon), Bryan City Limits (green outline icon), C.S. City Limits (blue outline icon), and Brazos County (grey fill icon). The top right corner has a 'Mapping' tab and a 'Search' tab. The bottom left corner features a 'Map Tool Options' panel with a small map thumbnail and text: 'The current cursor mode is set to 'Latitude-Longitude.' Clicking on the map will display the latitude and longitude of the point clicked in the panel to the right.' The bottom right corner shows the 'Active Tool: Find Lat/Lon Coordinates' with the following coordinates: Latitude: 30° 35' 41.25" and Longitude: 96° 19' 39.4". The bottom status bar includes a 'Done' button and an 'Internet' icon.

Basically, if you select a video camera icon, you can click on a hyperlink that will take you to a streaming video of a city council meeting's discussion about that area. We found it a useful way to geographically index videos for citizens to easily find out issues in a particular area instead of them having to dig through lots of text instead.
